PROFILE

Bachelor of Applied Science student in Electronics Engineering Technology at Semarang State Polytechnic. Focused on automation, IoT, and microcontroller-based systems. Experienced in PLC programming, hardware integration, and developing monitoring solutions. Familiar with Python, C++, and electronics troubleshooting. Seeking an entry-level position as an Automation or Instrumentation Engineer to apply technical expertise in system design, integration, and process automation optimization.

EXPERIENCE

Production & Quality Control Intern | PT Intech Anugrah Indonesia | July 2020 - August 2020

- Supported TV production line, including component assembly, precision soldering, and hardware maintenance.
- Performed firmware programming and rigorous QC testing to ensure unit performance and visual standards.
- Managed inventory data for production components using Microsoft Excel.

Volunteer (Orientation Mentor) | Politeknik Negeri Semarang | August 2024

- Served as a direct field mentor for a group of new students, providing guidance and ensuring adherence to orientation guidelines.
- Managed daily administrative tasks, including attendance tracking, progress monitoring for assigned tasks, and processing permit requests.
- Facilitated communication and conflict resolution within the group to ensure a smooth orientation experience.

EDUCATION

Bachelor of Applied Science in Electronics Engineering Technology | 2023 - Present

Politeknik Negeri Semarang

- Focusing on Industrial IoT and automation systems.
- Relevant Coursework: Control Systems, Microcontroller Programming, and Industrial Instrumentation.

Vocational High School (SMK) in Mechatronics Engineering | 2019 - 2023

SMK Negeri 7 Semarang

- Developed foundational skills in integrated mechanical, electronic, and pneumatic control systems.
- Gained practical experience in hardware assembly, pneumatic troubleshooting, and basic PLC programming.

SKILLS

- Automation Control: PLC Programming, PID Control, Instrumentation, and Pneumatic System.
- IoT & Connectivity: Raspberry Pi (Edge Computing), Node-RED Dashboarding, Microcontroller (ESP/Arduino), and Sensor Integration.
- Software & Programming: Python and C++
- Documentation & Productivity: Technical Reporting, Quality Control, and Microsoft Office Suite.
- Soft Skill: Collaborative Teamwork, Adaptability and Problem-Solving.

LANGUAGES

- Indonesian: Native
- English: Professional Working Proficiency (Intermediate)
